Prophetic for Alabama
By Anne Tate

The Lord says the Watchmen are continuing to rise in Alabama going higher and higher –They are being spun out like tops into assignments by the hand of the Lord, both right and left carrying His weight and purpose. Alabama will be the first State where we see a company of Watchmen standing shoulder to shoulder and advancing on purpose with focus and changing the atmosphere and the landscape.

Penetrating of eye and acute hearing of ear, they move in the kind of humility and quietness in the Spirit that snatches strategies out of the darkness of hiddenness. They challenge the old order by their asymmetrical movements. Their fight is not with man and great will be the provision and reward of their company.

Prophetic over Alabama
By Jacquie Tyre

As I looked out over Alabama in the spirit, I began to see fires erupting all across the state. At first it was like a little flicker then suddenly the fires flared becoming incredibly bright and roaring.

I heard the Lord say to not despise the days of small beginning for what is coming in the days ahead as the winds of My spirit blow from NW to SE and NE to SW, and West to East the flickering fires shall suddenly erupt into bon-fires of My glory upon the altars of worship and intercession that are being tended from place to place to place across the state.

Then, out of these altar fires I began to see fire-lines go out from the altars connecting one place to another, creating a power grid across the state. And, I heard the Lord say, this power grid is a grid of communication and distribution of resources — resources of anointing, authority, provision, protection, and power that are needed to strengthen the fortification of altar that is rising across the state.

As this altar of the Lord builds and strengthens across the state things that have held Alabama captive and press down in the past shall give way to times and seasons of breakthrough, recovery and restoration. Expect to see reversals of trends and expectations in the areas of finances, economy, business, education, and innovation that shall “put Alabama on the map” in ways beyond what she has seen before.

So, tend the altars and watch the weight of My glory overtake and disrupt what the enemy has done. The greater the weight of My glory the greater the victory that shall be had across the state of Alabama.
