

F-35 Dream

By Clay Nash

June 4 and 5, 2024

I dreamed that Dutch Sheets, Tim Sheets, Ken Malone and myself were flying F-35 jets. And I'm gonna stop right there to explain that in my dreams when Dutch Sheets is there he represents the apostolic Ekklesia and high level Ekklesia. And so, I want you to understand that I don't believe this is just literally about Dutch, Tim, Ken and myself. But anyway, we were returning to the aircraft carrier George HW Bush. Each time Dutch attempted to lead us and land on the carrier the ship's crew would fail to deploy the cable necessary to break our speed so we wouldn't overshoot the carrier. We tried landing seven times and each time we had to repower and circle around again. After the seventh aborted landing, Dutch being our commander, instructed us to follow his lead. As we pulled high up into the clouds, Dutch asked me to obtain the coordinates for the air carrier USS Abraham Lincoln. After a period of time I reported to all that the carrier was stationed in Chicago. You know, the USS Abraham Lincoln is actually nuclear. Very significant. We knew it could get there. But anyway, in the dream it was stationed in Chicago. And I also found out that the Democratic National Convention was being held on that carrier. Dutch then instructed us, we were to go there and land. We were then instructed by Dutch, that if we attained in speed Mach Five, the F-35 that we were flying, would be converted to F -5 B Lightning. And we would be able to land vertically. The difference between an F-35 and F-35 B is the B can land vertically. Instructions were given to us that we can only hover at that vertical landing. Hover for 12, managing the landing, or the engines would overheat.

I then had the same dream again. And in the second dream, we were instructed to hover and land on the Willis Tower in Chicago. Now, let me share this. The Willis Tower was the Sears Tower. Okay, that said we must land there, because it is the 12th tallest building in the world. When we arrived and landed the Justice gate, Angel, and 1000s upon 1000s of angels in the Angel army, not angels, angel armies, were there with scrolls in their hands. From up on top of the Willis Tower, we could observe, clearly, I'm going to add, clearly the Democratic National Convention on the USS Lincoln carrier. Ken, then said, "This is what I've been shown."

Couple of things here. I believe the Mach Five speaks of grace, God's empowering grace. And I think that's very important. You know, God's grace is not yes, but it's greater than unmerited favor. God's grace is Him empowering you as a Josiah Company. He empowers us to be who we are, He empowers our doing, our activities flow out of who we are, it flows out of our being. And so I feel like that is very significant. I feel that number 12, which is in there a couple of times about the landing, and the 12th tallest tower in the world. I believe that speaks of government. And when we landed on this Willis Tower, we had great observation of everything that was going on the USS Lincoln carrier, where the Democratic National Convention was being held. We could see their activity, very clear, and very plain. In other words, we weren't just positioned above them. We were also postured from a good observation platform. And they even did some research today and found out there is a platform where you can go on top of that, and you can see from there. And so there's several things I believe God is saying to the ekklesia. You, the Josiah

Company, that we're going to have to posture ourselves, in apostolic government, above all this craziness that's coming out of the out of the Democrats, out of those that are certainly seeking to destroy this nation. And I believe we have not only the authority to do so, I believe the accuracy has grown in wisdom and spiritual understanding, revelation and knowledge to where we can posture ourselves and our declarations and decrees are going to take on a form of effectiveness that is just going to be incredible. And so there is so much to this dream. We went up high in the cloud, there was a reconstituting of the F-35. When we reached Mach Five, it was reconstituted into an F-35 B Lightning. I've been studying this and praying into it. And I believe that what that is speaking about is God's function to give, equip us and empower us with greater abilities. And that we can, as the ekklesia, accomplish far more.
