

The JOSIAH COMPANY I See

By Clay Nash

The JOSIAH COMPANY I see is a territorial expression of ekklesia. This ekklesia will become a people aligned together, but remain diverse as individual companies and expressions of grace. These people of multi-generations are gathered as a result of a common cause, voiced and led by apostolic leaders from the many assemblies and companies. This ekklesia will communicate boldly through righteous actions and not words alone! Their actions will communicate a willingness to disturb the present in order to change the future. It is demonstrated by actions of obedience that legislate from Heavenly places God's will into the earth. They, through training, practice and obedience, will declare that religion will no longer be allowed to redefine truth to accommodate its weaknesses. This alignment of diverse generations will establish relational covenants that will produce liberty through presence led lives. This ekklesia will accomplish the freeing of those enslaved to the present disrupted culture. Reformation will be facilitated by becoming one body working together lifting His standard!
